Item 8.01 Other Events.

On September 7, 2021, Travere Therapeutics, Inc. (the “Company”) provided a regulatory update on the Company’s development program for sparsentan in focal segmental glomerulosclerosis (“FSGS”) following a Type A meeting with the U.S. Food and Drug Administration (FDA) during which the Company and the FDA reached alignment on a pathway for the Company to proceed with a submission for accelerated approval, pending additional eGFR data. The Company intends to provide the FDA with additional eGFR data from the ongoing DUPLEX Study in the first half of 2022, and if such data are supportive, to submit an application for accelerated approval in the U.S. in mid-2022. The DUPLEX Study is continuing as planned with no changes to the statistical analysis plan, and patients will proceed in a blinded manner to assess the treatment effect on eGFR slope over 108 weeks in the confirmatory endpoint analysis.

Forward-Looking Statements

This Current Report on Form 8-K contains "forward-looking statements" as that term is defined in the Private Securities Litigation Reform Act of 1995. Without limiting the foregoing, these statements are often identified by the words "may", "might", "believes", "thinks", "anticipates", "plans", "expects", "intends" or similar expressions. In addition, expressions of our strategies, intentions or plans are also forward-looking statements. Such forward-looking statements include, but are not limited to, references to the Company’s expected timing and plan for submitting additional eGFR data from the DUPLEX Study to the FDA; the expectation of submitting an application for accelerated approval of sparsentan for FSGS in mid-2022, pending additional supportive eGFR data; and expectations regarding the future conduct of the ongoing DUPLEX study. Such forward-looking statements are based on current information available to the Company and involve inherent risks and uncertainties, including factors that could delay, divert or change any such forward-looking statements, and could cause actual outcomes and results to differ materially from current expectations. No forward-looking statement can be guaranteed. Among the factors that could cause actual results to differ materially from those indicated in the forward-looking statements are risks and uncertainties associated with the regulatory review and approval process, including the Subpart H accelerated approval pathway in the United States, and the risk that the additional eGFR data will not support an accelerated approval submission. There is no guarantee that the FDA will accept for filing a NDA for sparsentan for FSGS under the Subpart H approval pathway, that the FDA will grant accelerated approval of sparsentan for FSGS or that sparsentan will be approved at all. The Company faces the risk that the Phase 3 DUPLEX Study of sparsentan in FSGS will not demonstrate that sparsentan is safe or effective or serve as a basis for accelerated approval of sparsentan as planned and risk that ongoing clinical trials may not succeed or may be delayed for safety, regulatory or other reasons. In addition, such risks and uncertainties may include those described in the Company’s annual, quarterly and current reports (i.e., Form 10-K, Form 10-Q and Form 8-K) as filed or furnished with the SEC, which are available at the Company’s website (www.travere.com) under “Investors & Media”. You are cautioned not to place undue reliance on any forward-looking statements as there are important factors that could cause actual results to differ materially from those in any forward-looking statements, many of which are beyond our control. Except to the extent required by law, the Company undertakes no obligation to publicly update any forward-looking statement.
